12:30 p.m. Networking Lunch
A working lunch will provide time for small groups to identify forms of capital they know most and least about building, and then brainstorm with whom they might connect to build or strengthen those capitals in the community and throughout the region.

1:30 p.m. Map Value Chains, Identify Gaps/Opportunities and Design Interventions
This session will deepen participants’ understanding of value chains, defined as collaborative networks that aim to both meet market demand and generate greater local wealth overall. First, participants will learn the utility and application of a value chain tool to map and understand opportunities. Then, in small groups, participants will map a value
chain for a product or service associated with the selected sector and work through a series of discussion-based questions to assess how to link local assets to meet market demand.
